Summary

Undergraduate in Computer Science Engineering with real-world experience in full-stack application engineering, secure system design, and software development. Skilled at creating scalable, high-performance solutions that focus on clean architecture, data security, and efficient API design. A solid understanding of algorithmic problem-solving and object-oriented principles, along with hands-on experience with cybersecurity and working on real-world projects. Very motivated and detail-oriented, looking for software development jobs where I can make a difference by creating production-ready solutions in fast-paced settings.

Technical Skills

Programming Languages: C/C++, Python, HTML, CSS, JS, SQL

Concepts: DSA, OOP, STL, Cybersecurity Fundamentals & Penetration Testing

Tools & Platforms: OpenAI API, GitHub, Power BI, AWS

System Concepts: Automation Systems, IoT Integration, Sensor Data Processing, Linux, Kali Linux

Experience

Cognifyz | WB | C/C++ Programming intern | 01/2025-02/2025

Developed logic-based programs using C and C++, Improved problem-solving and code optimizing skills

Code Alpha | WB | C++ Programming Intern | 01/2026-03/2026

Built console-based applications using C++ Strengthened object-oriented Programming and real-world coding practices

Projects

- Honeypot System:** Architected an enterprise security monitoring platform using Python (FastAPI/Pandas), Kafka, and React to intercept and classify intrusion vectors in real time, designing the complete microservices telemetry pipeline and signature engine, resulting in instantaneous threat visibility and automated severity-based alerting.
- File Encryption Tool:** Developed a key-based file encryption/decryption system in C to ensure secure data handling, implementing the full logic, achieving reliable data protection with consistent integrity.
- Heuristic Workout App:** Created a Python-based app for automated daily workout planning with notifications, designing the recommendation logic, leading to improved user consistency and engagement.
- Dynamic API Generator:** Engineered a full-stack solution to automate API creation using JavaScript and backend frameworks, building the system end-to-end, significantly reducing manual development time.

Certifications & Training

National IP Awareness Mission -Govt. Of India, Great Learning Cyber Security – Tech Mahendra, AIML Webinar – G.T.L Academy (Hosted by Grindx Technologies)

Education

B. Tech in Computer Science Engineering, Adamas University | 2023 – 2027 (6.5 CGPA)

Higher Secondary, UKBI | 2022-2023 (61.9%)

Secondary, UKBI | 2020-2021 (86.5%)
